To Whom It May Concern

This is to certify that *Mr Aman Burman*, a *Year 9 student from Dubai College* pursued an internship under my guidance for three weeks (22nd July –16th August 2019).

During the period of his internship, Aman has learnt basics of the programming language C and developed some theoretical knowledge on various data structures (Linked List, Tree, and Graph) and searching & sorting algorithms. He has also implemented some of these concepts in C.

Aman is extremely diligent and motivated student who is willing to learn new concepts and implement the knowledge in practical setting.

I wish Aman all the success for his future endeavours.
